Situation Summary

Andorra remains a low-threat jurisdiction with a composite threat score of 7 and no tracked discrete security events in the current reporting period. Two policy and legal developments emerged in the past week-one expanding the government's ability to enforce international sanctions related to Russia's war in Ukraine, and one reaffirming judicial detention procedures in a drug-trafficking case. The security environment is stable and does not warrant elevated corporate concern.

Key Developments

- Andorra, nationwide - 22 October 2026: The government announced an amendment to international-sanctions law, presented to the General Council, that would enable Andorra to bar entry to individuals sanctioned over Russia's war against Ukraine. This represents a procedural alignment with EU and multilateral sanctions regimes and signals no domestic instability.

- Andorra la Vella - 22 October 2026: The Constitutional Court ordered pretrial detention of an individual accused of cocaine trafficking, citing flight risk. No corroborated details on arrest date, specific trafficking location, or broader trafficking network are available from the current reporting window.

No other verified security-relevant events in Andorra were identified during 21-27 October 2026.

Highest-Risk Areas

Sub-national risk rankings are unavailable for Andorra. At the national level, Andorra la Vella, the

capital and largest urban center, naturally concentrates government, commerce, and law enforcement activity. The cocaine trafficking case-a standard criminal-justice matter-is indicative of routine drug-transit risk common to small Alpine and Pyrenean jurisdictions positioned between major European narcotics markets, rather than organized violence or instability. No geographic concentration of elevated threat within Andorra is evident.

How GeoBit Would Assist

For corporate teams with personnel or assets in Andorra, Intel Sweep and multi-language OSINT, combined with X/Twitter and Telegram OSINT, enable continuous monitoring of policy changes, law enforcement activity, and emerging incident signals with minimal latency. AOI Monitoring & Early Warning can establish persistent watch on key locations (corporate offices, facilities, travel corridors) with automated alerting if threat indicators rise. Network & Actor Analysis can map individuals and entities linked to transnational crime or sanctions evasion, supporting duty-of-care and compliance verification for business partners or supply chains operating in Andorra.

7-Day Outlook

No escalation in Andorra’s security posture is anticipated. The sanctions amendment reflects predictable policy harmonization and poses no operational risk to corporate activity. Routine law enforcement action-including drug-trafficking cases-will continue and remain a low-level background risk. Andorra’s stability and cooperative stance with international security and sanctions regimes support a stable near-term trajectory for corporate security operations.
