Situation Summary

Israel remains at Composite Threat Score 95 (global rank #10), with the security picture shaped primarily by localized settler-Palestinian friction in the West Bank and isolated cross-border incidents along the Jordan frontier. The past week saw no major attacks or nationwide disruptions; risk remains concentrated in specific geographic flashpoints rather than diffuse across Israeli territory. The trajectory reflects persistent structural tensions in occupied and disputed areas, with no indicators of imminent escalation to wider conflict.

Key Developments

- November 10, Qusra (northern West Bank): Settlers attacked Palestinian olive harvesters and civil-rights activists with stones, clubs, and slingshots; six people injured, including four activists, a journalist, and one Palestinian resident.

- November 10-11, near Burqa, Wadi Rahim, and Jalud (West Bank): IDF and Border Police evacuated and demolished four unauthorized settler outposts. Settlers erected burning-tire and rock barricades, damaged two security vehicles, threw stones, and carried out arson; three Israelis detained.

- November 10, outside the Knesset (Jerusalem): Several hundred right-wing protesters demonstrated during the new Knesset's swearing-in, warning of civil war if a government received Arab-party support; demonstration remained largely peaceful with police barriers and armed Border Police deployed.

- November 14, near Beit Fajar (south of Bethlehem): Masked Jewish Israelis attacked Palestinian

olive harvesters, smashed a Palestinian vehicle, and wounded five Palestinians; Israeli forces declared the area a closed military zone.

- November 14, near Beit Umar (north of Hebron): Palestinians threw rocks at an Israeli vehicle, smashing its windshield and lightly injuring the driver; security forces established roadblocks and searched for suspects.

- November 14, Har Homa (East Jerusalem): Four minors arrested after allegedly throwing stones at a bus and smashing its rear window.

- November 14-15, Dead Sea coast (Israel-Jordan boundary): Israeli Border Police arrested six suspected infiltrators who allegedly crossed from Jordan by inflatable boat and moved westward inland.

- November 14-15, Israel-Jordan border: Israeli forces seized eight handguns, suspected hashish, GPS devices, and SIM cards in two separate searches; no arrests reported.

- November 14-15, Dead Sea: Jordanian authorities detained an Israeli civilian who reportedly crossed into Jordanian waters while swimming from Israel.

Highest-Risk Areas

Sub-national risk data remain unavailable; however, reporting concentrations indicate the West Bank-particularly areas around Hebron, Bethlehem, and the northern highlands-as the primary locus of violence this week. Secondary concern attaches to the Israel-Jordan frontier, where infiltration and smuggling activity created Border Police operational tempo. East Jerusalem saw minor youth-driven stone-throwing; Israeli proper remained quiet.

How GeoBit Would Assist

Security teams would deploy AOI Monitoring & Early Warning on high-friction West Bank zones (Qusra, Beit Fajar, Beit Umar) to detect settler mobilization and harvest-season violence patterns before incidents occur. Border & Disputed-Territory Search and Network & Actor Analysis would map infiltration routes, smuggling vectors, and actor networks operating across the Jordan frontier. Routing & Network Analysis would support duty-of-care planning for travelers and personnel in West Bank urban corridors during volatile periods.

7-Day Outlook

Olive harvest season (typically through November) is likely to sustain settler-Palestinian friction in West Bank agricultural zones. Cross-border infiltration and smuggling will remain a steady Border Police focus, particularly along the Dead Sea and Jordan Valley. No indicators suggest imminent escalation; risk remains localized and episodic.
