Threat Trajectory

Threat Breakdown

Each category 0-100, scored from live conflict, insurgency, crime, protest & Cloudflare Radar cyber feeds. See the full threat matrix

Cyber & Internet Disruption

Layer-7 DDoS attack intensity (0-100, normalized) & internet outages over the last 90 days, daily, all on one scale - Source: Cloudflare Radar.

Situation Summary

India's composite threat score of 66 reflects persistent civil unrest across multiple regions, driven by infrastructure protests in the northeast, active militant and insurgent activity in Jammu & Kashmir and Manipur, and localized communal and criminal incidents. The past seven days saw incidents spanning armed clashes, border incursions, aviation security threats, and civilian violence, distributed across at least six states. The threat landscape remains fragmented by region rather than unified, with no indication of national-level escalation, though operational tempo in conflict zones remains elevated.

Key Developments

- Srinagar, Jammu & Kashmir (8 Nov): Police arrested Junaid Ahmad Band following a video showing him brandishing an AK-47 while threatening a neighbor in Hazratbal; FIR registered at Nigeen police station.

- Samba sector, Jammu (8 Nov): Border Security Force reported shooting and killing an intruder attempting to cross the India-Pakistan international border.

- Noney district, Manipur (4 Nov): Three suspected insurgents killed and two wounded in overnight gunfight between rival armed Naga groups near Taodaijang village; Manipur Police and central forces initiated combing operations and identity checks on 5 November.

- Ashabari, Sepahijala district, Tripura (2 Nov): Villagers attacked a BSF vehicle after personnel detained a suspected smuggler; three BSF personnel injured and weapons reportedly targeted. Eight

additional suspects arrested by 6 November, bringing total arrests to 18.

- Dibrugarh, Assam (6 Nov): Industrial accident at Oil India's Intermediate Tank Farm during maintenance killed three people, including two workers and one engineer.

- Kempegowda International Airport, Bengaluru (7 Nov): IndiGo flight 6E 451 (Bengaluru to Lucknow) returned to gate after crew discovered a suspected hijack-threat note; airport declared full emergency and conducted security checks.

- Faridabad, Haryana (6-7 Nov): A Singapore-based corporate executive shot dead by a neighbor during a parking dispute; suspected shooter arrested.

Highest-Risk Areas

Sub-national risk rankings are currently unavailable; however, event clustering from the past week indicates Manipur, Jammu & Kashmir, and the northeastern states (Assam, Tripura) as operational hotspots. Manipur continues to experience inter-insurgent violence among armed Naga factions, while J&K shows persistent weapons availability and border activity. Tripura's attack on security forces and subsequent mass arrests suggest elevated community tensions around law-enforcement presence and border management. Arunachal Pradesh's anti-dam protests (from prior weeks) remain a civil unrest driver in the northeast.

How GeoBit Would Assist

Security teams operating in India should leverage AOI Monitoring & Early Warning on high-risk districts (Noney, Sepahijala, Samba) to detect emerging militant activity and protest mobilization before escalation. Intel Sweep and multi-language OSINT fusion across X, Telegram, and local news feeds would enable tracking of protest rhetoric and armed-group signaling in real time. GIS & Spatial Analysis combined with Routing & Network Analysis would support duty-of-care teams in identifying safe transit corridors and avoiding protest zones or border-adjacent areas during operational planning.

7-Day Outlook

Expect continued low-intensity militant and insurgent activity in Manipur and J&K, with periodic border incidents remaining routine. Northeast anti-dam and environmental protests are likely to persist through the season, with sporadic violence at police contact points. No indicators suggest rapid escalation to national-level instability; risk remains sub-regional and episodic.
